

MICHAEL WALKER COPEMAN

mikecopeman@gmail.com | [LinkedIn](#) | [Website](#) | Cape Town, South Africa

PROFESSIONAL SUMMARY

Quantitative Researcher with a successful financial modelling track record. Work experience supervised by senior financial professionals in a startup environment. Strong mathematical background and experience with SOTA machine learning methods.

WORK EXPERIENCE

Quantitative Researcher - *Silvertree AI Investments*

Silvertree AI Investments is a hedge-fund running a long-short global equity portfolio powered by machine learning and artificial intelligence.

November 2023 - Present

Specialization: The Numerai Data Science Tournament (Forecasting Global Equity Returns)

- Working with state-of-the-art machine learning techniques to produce high quality predictions of the global equity market on a medium-term time horizon (20 – 60 days)
- Research intensive position involving engineering, analysing and experimenting on cross-sectional medium-size tabular global equity data
- Developing risk strategies involving investment into these models
- Weekly presentations to a small team including highly experienced managers from the South African and British finance industries
- Involves multi-disciplinary understanding of machine learning, finance, cryptocurrency, and AI
- Implementation of Agentic AI enhanced research methods with Cursor and Claude

EDUCATION

Bachelor of Science in Mathematics (GPA: B+)

Supporting coursework in Computer Science, Applied Mathematics, and Mathematical Statistics

University of Cape Town

2021 - 2023

Erasmus Student Exchange Program (One Semester)

University of Split, Croatia

September 2022 – February 2023

TECHNICAL SKILLS

Data Science: Python, Jupyter Notebooks, Pandas, Data Engineering, Data Analysis, API Integration

Machine Learning: Supervised Learning, Medium-Sized Tabular Data, LightGBM, Random Forest, Neural Networks, Linear Regression, Time Series, OOS Cross Validation, Low Signal to Noise Ratio Data, Prompt Engineering, Backtesting & Model Surveillance

Finance: Global Equity Long Short Trading, Risk Management, Factor Models, Beta/Factor Neutral Investing, Computational Finance

RESEARCH PORTFOLIO

Numerai Signals Tournament — Hedge fund-style ML competition requiring original alpha signals for global equity forecasting. Scoring incentivises uniqueness of signal, rewarding creative and independent research.

Live Model (mc61b): Deployed September 2025. Achieved **120% return on stake** since deployment. Operates with real financial risk, creating direct accountability for model performance.

Tournament Profile: signals.numer.ai/migy007 | Live Model: signals.numer.ai/mc61b
